

Materials and Cleanup Guidelines

If you are using solvents, **only Gamsol or Odorless Turpenoid are allowed in the studios.** Some people are more sensitive to fumes than others so out of respect for everyone **turpentine and mineral spirits may not be used while at GCA.**

While painting please keep the lid on your jar and open it only while actually using it. Small sized jars are greatly encouraged in order to minimize the amount of fumes released in to the studios.

If you need to use retouch or other varnishes please go outside to use it.

When washing your brushes please make sure that all paint is washed out in your solvent jar or wiped on to rags. Only use the sinks to rinse small amounts of clean solvent out of your brushes. Do not put paint down the drain.

All paint rags and paper towels must be disposed of in the red metal containers (located in each studio) at the end of each session. These containers will be emptied at the end of each day.

Dirty solvents should be dumped only in to the red plastic disposal jugs (located in each studio) never down the sink.

ART SUPPLY STORES
